Hospital Performs Worse Than Average  Better Than Average

This Hospital's Score:**1.01****Best Hospital's Score:****0.55****Average Hospital's Score:****1.01****Worst Hospital's Score:****2.74****Harmful Events**

Patients can experience complications and potentially harmful events following a surgery, a procedure, or childbirth. When all of these errors are examined together, it gives a better picture of a hospital's ability to keep its patients safe.

This number represents the number of times patients experienced dangerous safety-related adverse events for every 1,000 people discharged. [For details on sources, click here.](#)

What safer hospitals do:

These potentially avoidable safety events represent opportunities for improving patient care. Staff should document when errors happen, discuss how the error occurred, and develop a plan to prevent future errors.

Notes and Definitions

1. Declined to Report: The hospital was asked to provide this information to the public, but did not.

2. Not Available: "Not Available" means that the hospital does not have data for this measure. This could be because the measure is related to a service the hospital does not provide. For example, a hospital that does not have an ICU would not be able to report data about ICUs. It could also be because the hospital had too few patients or cases to report data for a particular condition or procedure. A "Not Available" result does not mean that the hospital withheld information from the public.

LEGAL DISCLAIMER: The Leapfrog Hospital Safety Grade scores hospitals on their overall performance in keeping patients safe from preventable harm and medical errors. The grades are derived from expert analysis of publicly available data using up to 31 evidence-based, national measures of hospital safety. No specific representation is made, nor shall be implied, nor shall The Leapfrog Group be liable with respect to any individual patient's potential or actual outcome as a result of receiving services performed at any of these hospitals. Leapfrog Hospital Safety Grades cannot be republished without expressed written permission from The Leapfrog Group.
